

Qualifications:

Engineering Diploma
IHVE, London University of
the South Bank

Profile:

An engineering industry professional with 40 years' experience who has initiated and led organisational strategic business and technical development initiatives over the past 15 years.

Experienced in the entire range of industry activity, both in the UK and overseas; consultancy, prime contractor, major project design and build, technology delivery and long-term facilities management and outsourcing.

18 years experience as a Main Board Director leading all aspects of the business cycle from start up, operations, strategic alliances, joint ventures, profit delivery and loss recovery.

What I will bring:

Strategic management on large infrastructure projects for the procurement and delivery of complex engineering systems. Ensuring performance to Client specified requirements. This includes the management of stakeholders and active participation with the supply chain.

I have played a key role at Board level in the following projects:

- CTRL track systems including Tunnel ventilation
- CTRL St. Pancras Station redevelopment
- Jameirah district cooling
- Hong Kong Air Cargo
- Jubilee Line Extension (JLE)

Experience:

May 2007 to-date Managing Director

Project and Engineering Systems management, providing expert staff and management process in the UK and International markets.
Consultancy services to EMCOR Group and Technology companies.

1990 – April 2007 Main Board and Group Technical Director

Group Role: Strategic Business Development, Technology Alliances, Engineering Process and Risk Management, HSQE, Systems Assurance (RAMS) and Life Cycle Management.
